Dr. V. C. Vaughan.

ANN ARBOR, MICH., March S .-During my recent visit to Mexico several persons inquired about Dr V. C. Vaughan, who was instructor in Hardin College during the first term; in fact, he began teaching with the launching of Hardin. Dr. Vaughan came to this city in '74, graduating in '77 in the Literary Department, with chemistry a specialty, afterwards took the degree of Ph. D. and, later, of M. D. At present, he is Prof. of phys-

ological and pathological chemis try and associate Prof. of therapeutics and Materia Medica, is a member of the State Board of Health, has written several books pertainng to his specialties, which are doing service as text books, besides having an extensive practice. He has recently been experimenting in generating, developing, and treating consumption in the monkey tribe; and it is said that the only experiment that has ever

baffled his skill was a failure to produce a pulmonary disease on a pair of cast-iron rabbits, which were sent him by a friend, who made the statement that "he knew of a kind of rabbit on which disease could not be produced, not even to further science." This gifted man, whose synonym is 'wonderful," is a hard worker, and while a great favorite with all students-his influence over them being almost magical-has perfect command of his classes and when he enters the lecture room a' thrill of delight pervades the atmosphere.

I like Ann Arbor; the people are hospitable and social; the breadth of the University can hardly be reckoned, unless by the great army of students, I think nearly 1700, for their guidance. which is a significant comment on its popularity. With 94 able professors and one of the largest and affords every facility for investigation, no wonder the student from nearly every country is drawn ing you success in all your enterprises, I am, most truly, Mrs. R. M. Herbon.

Up to a few weeks age I considered myself the champion Dyspeptic of America. During the years that I have been afflicted I have tried almost everything claimed to be a specific for Dyspepsia in the hope of finding something that would afford permanent relief. I had about made up my mine to abandon all medicines when I noticed an endorsement of 812-MONS LIVER REGULATOR by a prominent Georgian, a jurist whom I knew, and concluded to try its effects in my case. I have used but two hot-tles, and am satisfied that I have struck the right thing at last. I felt its beneficial effects almost immediately. Unlike all other preparations of a similar kind, no special instructions are required as to what one shall or shall not eat. This fact alone ought to commend it to all troubled with Dyspepsia. J. N.
